

## CONTENTS

<b>THE BASIC CONCEPTS OF STATICS .....</b>	<b>13</b>
1.1 The laws of mechanics.....	13
1.2 Rigid body and the material point.....	15
1.3 The concept of force .....	16
1.4 Types of forces.....	18
1.5 External and internal forces.....	19
1.6 The rules of statics .....	22
1.7 The degrees of freedom, constraints .....	27
1.8 Release from constraints.....	28
1.9 Catalogue of supports .....	29
<b>FORCE SYSTEM IN A STRAIGHT LINE .....</b>	<b>34</b>
2.1 Addition of identically directed forces.....	34
2.2 Addition of oppositely directed forces.....	34
2.3 The resultant of a force system in a straight line .....	35
2.4 Equilibrium conditions of forces in a straight line .....	36
2.5 The principles to be followed in solving equilibrium tasks.....	36
2.6 Examples of tasks for the system of forces on a straight line.....	39
<b>PLANAR SYSTEM OF CONVERGENT FORCES.....</b>	<b>44</b>
3.1 Force projection on an axis.....	44
3.2 Force in the Cartesian system of coordinates.....	45
3.3 A resultant of a planar system of convergent forces.....	46
3.4 Equilibrium conditions of a planar system of convergent forces.....	50
3.5 The equilibrium of three nonparallel forces .....	51
3.6 The methodology of solving equilibrium problems .....	52
3.7 Examples of tasks for planar systems of convergent forces .....	57
<b>ARBITRARY PLANAR SYSTEM OF FORCES .....</b>	<b>71</b>
4.1 Moment of a force about a point.....	71
4.2 Reduction of a planar system of forces to any point.....	79
4.3 Equilibrium of a planar system of forces .....	80
4.4 Systems of coordinate axes.....	81
4.5 Planar system of parallel forces.....	81
4.6 Ritter's method .....	84
4.7 Examples of tasks for the planar system of forces.....	86

<b>FRiction AND ROLLING RESISTANCE .....</b>	<b>101</b>
5.1 Sliding friction .....	101
5.2 Friction of a tie against a drum.....	111
5.3 Rolling resistance .....	114
5.4 Examples of tasks for a planar system of forces with friction .....	118
<b>A SYSTEM OF CONVERGENT FORCES IN SPACE.....</b>	<b>124</b>
6.1 Force description in the Cartesian spatial system of coordinates .....	124
6.2 Equilibrium of the spatial system of parallel forces .....	127
6.3 Examples of tasks for the spatial system of convergent forces.....	130
<b>SPATIAL FREE SYSTEM OF FORCES.....</b>	<b>134</b>
7.1 Moment of a force in space.....	134
7.2 Reduction of a free system of forces in space.....	142
7.3 The conditions of equilibrium for spatial system of forces .....	145
7.4 Examples of spatial exercises of any force systems .....	147
<b>STATICALLY DETERMINATE AND INDETERMINATE TASKS.....</b>	<b>150</b>
8.1 Planar issues.....	151
8.2 Spatial issues .....	152
<b>CENTRES OF GRAVITY .....</b>	<b>154</b>
9.1 Reduction of the spatial system of parallel forces .....	154
9.2 The centre of gravity of solids.....	156
9.3 Centres of gravity of planar shapes .....	159
9.4 The centre of gravity of a line given in space.....	164
9.5 Method of calculation of gravity centre coordinates .....	166
9.6 Examples of tasks for gravity centre designation .....	170
9.7 Gravity centres of basic geometric figures.....	175
<b>THE CENTRE OF BUOYANCY .....</b>	<b>181</b>
10.1 Designation of the centre of buoyancy .....	181
10.2 The centre of buoyancy of a rectangular pontoon .....	183
<b>THE EQUILIBRIUM OF TIES - ROPES .....</b>	<b>194</b>
11.1 Rope equilibrium conditions .....	194
11.2 The rope equilibrium form – rope curve .....	197
11.3 Chain curve.....	198
<b>APPENDIX ELEMENTARY INFORMATION FROM THE VECTOR CALCULUS.....</b>	
Jan Szmelter – the late co-author .....	221
Fathers of mechanics and their works.....	223
Literature .....	224
